

## Dot Ai to Unveil Next-Generation Asset Intelligence Platform at Manifest 2026

January 28, 2026

*Dot Ai joins Wiliot and Würth Industry North America to showcase the intelligence layer powering modern industrial operations*

LAS VEGAS--(BUSINESS WIRE)--Jan. 28, 2026-- [Dot Ai](#) (Nasdaq: DAIC) (“Dot Ai” or the “Company”), an IoT and AI-based SaaS company redefining asset intelligence for industrial technology, today announced it will participate in Manifest 2026, taking place February 9-11, 2026, at The Venetian in Las Vegas. At the event, Dot Ai will exhibit its next-generation [Dot Matrix 3.0 Asset Intelligence platform](#), designed to deliver continuous, in-process intelligence across complex manufacturing, warehouse, and logistics operations.

Dot Ai will appear in a panel alongside strategic partners Wiliot and Würth Industry North America, highlighting how ambient IoT, AI-driven analytics, and industrial-grade infrastructure come together to form a new intelligence layer underpinning modern supply chains.

“Industrial operations generate enormous complexity, and humans alone can’t manage that complexity efficiently,” said Ed Nabrotzky, CEO and Co-Founder of Dot Ai. “Our Dot Matrix 3.0 is designed to turn physical assets into intelligent participants in a workflow – providing continuous context about where things are, what state they’re in, and how they need to move. That intelligence layer is what enables automation, reliability, and scale in real-world industrial environments.”

### Unveiling the Next Generation of Asset Intelligence

At Manifest 2026, Dot Ai will introduce its 3.0 platform architecture, representing a significant evolution in how asset-level data is captured, contextualized, and operationalized across industrial environments. The platform is designed to support always-on intelligence, enabling manufacturers and logistics operators to move beyond episodic scans toward continuous, automated insight.

The 3.0 architecture is built to make physical assets intelligent participants in a workflow – able to understand where they are, where they are supposed to be, and how they fit into broader operational processes – forming the foundation for algorithmic decision-making in complex industrial systems.

Dot Ai’s platform integrates ambient IoT technologies, including battery-free sensing, with industrial-grade readers and cloud-based analytics, enabling scalable deployment across real-world manufacturing and logistics environments. Together with Würth’s global logistics expertise and customer footprint, the collaboration demonstrates how intelligence can extend from the factory floor through distribution and fulfillment.

Attendees are invited to visit Booth #870 to see live demonstrations and engage directly with the teams behind the platform.

### Featured Session: The Intelligence Nobody Talks About... but Everyone Depends On

Dot Ai will also participate in a featured session at Manifest titled “The Intelligence Nobody Talks About... but Everyone Depends On,” examining the invisible intelligence layer that enables modern industrial operations to function at scale.

The session will feature perspectives from Chad Baker, Director of Asset Intelligence Solutions at Würth Industry USA; Amir Khoshniyati, Vice President at Wiliot; and Ed Nabrotzky, CEO and Co-Founder of Dot Ai.

Together, the panel will discuss how ambient data, AI-driven intelligence, and real-time context are enabling more reliable, scalable industrial operations. The discussion will take place on February 10, 2026, 2:00pm - 2:35pm Room: Track 2 during Manifest 2026 at The Venetian in Las Vegas.

### About Dot Ai

At the heart of the technological revolution in asset management and security lies Dot Ai, a trailblazing SaaS service that is defining Asset Intelligence for smart supply chain operations. By harnessing the power of real-time IoT tracking technology and AI-enhanced analytics, Dot Ai stands at the forefront of innovation, offering patented solutions that are not just advanced but transformative. Through relentless research and development, Dot Ai has engineered a suite of technologies that empower organizations to not only streamline their logistics and supply chain processes but also bolster operational security to unprecedented levels. Leveraging state-of-the-art AI engines, cutting-edge 5G RF and BLE technology, and seamless API integrations, Dot Ai transcends traditional boundaries, offering real-time asset visibility and predictive analytics that integrate effortlessly with existing infrastructure. This is not just technology; it’s a vision for a more secure, efficient, and connected world. Discover more about how Dot Ai is leading the charge in Asset Intelligence by visiting <https://daic.ai>.

### About Manifest 2026

Manifest is the premier global event for supply chain and logistics innovation, uniting Fortune 500 executives, logistics service providers, innovators, and investors at the forefront of technological advancements. With a focus on showcasing leading-edge innovation and fostering meaningful connections, Manifest provides an unparalleled platform for industry executives, entrepreneurs, and investors to explore the forces shaping the future of the supply chain industry.
